# USER GUIDE

Remote Shuter

## **A) PAIRING**

- 1- Turn on the remote shutter by switching the "on/off" button on the side. The shutter will enter pairing mode and the LED indicator will start flashing quickly.
- 2- Activate the Bluetooth function on your smartphone and search for devices.
- 3- Select the device from the list and pairing will be automatically concluded in a few seconds.

## **B) TAKING PHOTOS**

Use your smartphone inbuilt camera app and press the button on the remote shutter to take a photo.

If your inbuilt camera app does not support the remote shutter, download and install another app from the App Store or Google Play.
